

Learning, Earning and Investing

Interactive: Invest Test

Teacher Guide

The Invest Test consists of one question for each lesson in Learning, Earning and Investing. As they take the test, the students get explanations of the correct answers. At the end of the test, they receive their score. Here are some ways to use the Invest Test with your students.

1. Have the students take the test for fun. When they are finished, discuss the answers to the questions they found the most difficult.
2. Have the students take it as a diagnostic pretest. You can then emphasize the lessons where they had the most difficulty.
3. Have the students take it as a posttest. You can then review the lessons where they had the most difficulty.
